- ☐ True
- ☐ False

WHAT WOULD YOU DO?

You have just come to work as an apprentice in a busy plant floor to work with experienced lockout/tagout/tryout worker. You have never done this kind of work. He gives you about an hour explanation of the work together with short on-site review. He says "now you are ready to go it alone" and you say nothing but know you are in over your head.

What would you do?
